

UNIVERSITY OF CRETE
SCHOOL OF PHILOSOPHY
DEPARTMENT OF HISTORY AND ARCHAEOLOGY
Interinstitutional Programme of Postgraduate Studies in Ottoman History
IN COLLABORATION WITH THE INSTITUTE FOR MEDITERRANEAN STUDIES,
FOUNDATION FOR RESEARCH AND TECHNOLOGY-HELLAS

**REGULATIONS ON PLAGIARISM AND THE USE OF ARTIFICIAL INTELLIGENCE
SYSTEMS AND APPLICATIONS**

Article 1: General Principles

1. The text of all coursework assignments and the M.A. thesis submitted by students enrolled in the Interinstitutional Programme of Postgraduate Studies in Ottoman History must be the student's own work. The author of a coursework assignment or thesis must clearly and fully acknowledge all unpublished and published sources used in the work, in accordance with established academic referencing conventions.
2. The M.A. thesis must also make an original contribution, either through the sources used, through its methodology, synthesis and analysis, or through a combination of the two.

Article 2: Plagiarism

Plagiarism constitutes serious academic misconduct. Plagiarism includes copying and/or using another person's published or unpublished work without appropriate acknowledgement. The use of any supporting or evidentiary material without proper acknowledgement of its source, including material drawn from the student's own previously produced work, constitutes serious academic misconduct and may infringe copyright law. Such conduct may be subject to the applicable legal remedies and may result in the student's removal from the postgraduate programme.

Article 3: Artificial Intelligence

1. The use of artificial intelligence (AI) systems and applications is permitted only as a means of support and must not replace the student's own thinking. The verbatim copying or reproduction of content generated by AI systems or applications, without critical human evaluation and revision, is prohibited and may result in the student's removal from the postgraduate programme, as it constitutes serious academic misconduct. The undisclosed use of AI systems and applications for supportive purposes also constitutes serious academic misconduct and may result in the student's removal from the postgraduate programme. Any such use must be expressly declared in the coursework assignment or M.A. thesis in which the AI tools were used, and the manner in which they were used must be clearly described.
2. A postgraduate student who uses AI systems or applications remains responsible for the accuracy, integrity and legality of the final content of the work in which they have been used.

Where AI systems or applications have been used, the student must include the following statement in their coursework assignment or M.A. thesis: "In preparing the text of this coursework assignment/dissertation, the artificial intelligence tool was used exclusively for language editing, clarification of theoretical concepts, and standardisation of structure. The final text was checked, amended and approved by the author. All scholarly analyses, judgements and references are based on my own research".
